

East Locality Group Notes

Kings Centre
30 Queen Anne's Road,
Great Yarmouth,
NR31 0LE

The East Locality Group had three main topics:

Lee Gibbons, update on the Learning Disability Partnership Board

Amanda Johnson, looking back on the past Learning Disability Strategy

Open discussion, Your thoughts on what you would like to see in the next Learning Disability Strategy?

Update on the board (1)

Lee explained that last board meeting they were joined by Roger Allen and Edward Young; they spoke about Employment.

You can find the employment notes on our website:
<https://www.norfolkldpartnership.org.uk>

Lee provided information on whether the 9:30 start for bus passes is national or local, this was found by a member of the board

Update on the board (2)

If you would like this information on bus passes, please email:
contact@norfolkldpartnership.org.uk

Lee told the group that the board had welcomed
5 new self-advocates

And 2 organisations to the partnership board

Amanda Johnson (1)

Amanda explained what the learning disability strategy is.

The strategy is a plan to make support better for people in Norfolk with a learning disability and their carers.

Amanda Johnson (2)

Currently a new strategy is in development with the Learning Disability Partnership Board and in partnership with the NHS Norfolk & Waveney Integrated Care Board.

The strategy will include speaking with people that have a learning disability, their families and carers and the wider community in Norfolk.

Amanda Johnson (3)

Amanda shared with the group what Norfolk County Council have been doing since the previous Learning Disability Strategy

The previous strategy outlined ten priority outcomes for people with a learning disability. The strategy was called, “My Life, My Ambition, My Future”. Here is some of what we have been doing:

1. Having the right place to live

You told us you wanted choice in finding the right place to live.

What people told us (1)

People told us that there are some important things in their choice of home. They want to:

Live in their own home, with the support that they need

Be part of their local community

What people told us (2)

Feel safe where they live

Choose who they live with

Include their carers and families when choosing where they live

What people told us (3)

Based on what you told us, we have been making different types of supported living accommodation.

Due to Covid, we were not able to start the Supported Living programme until 2021.

Types of Supported Living we now offer (1)

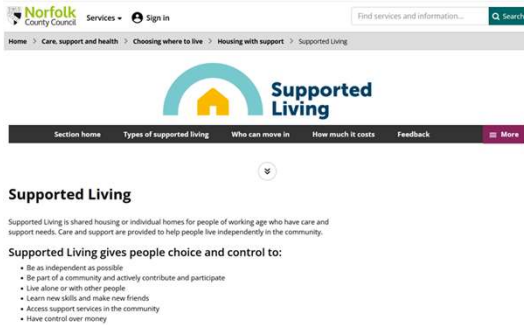

- **Shared housing**
- **Enablement**
- **Community housing**
- **Higher care and support needs**

Types of Supported Living we now offer (2)

You told us that you wanted there to be housing options on the council website for people with a learning disability.

We have developed a website called ‘Supported Living’ that includes information about housing for people with a learning disability: [Supported Living in Norfolk - Norfolk County Council](#)

Shared Lives

Involve

You told us that “Shared Lives schemes are good; more people should get involved.”

We want to get better

You have told us that you do not know about the various kinds of housing that is available for people with a Learning Disability

We want your help to find better ways of making sure people know what housing choices there are and how you can get useful information.

2. Having employment, work, education, training opportunities

You told us that you want there to be more support to help a person with a learning disability get a job.

You told us that you wanted more employers to employ people with a learning disability, including Norfolk County Council.

Training employers

In April 2019, we launched a new 'Skills & Employment Team

As a result, a new 'employer resource' has been set up and since December 2019 the team have supported more employers to become registered as 'Disability Confident'.

New Employment Service (1)

We also launched the Adult Services Norfolk Employment Service in July 2019

18 to 65

The Employment Service supports people with a disability and those people with mental health needs who are aged between 18 and 65.

New Employment Service (2)

There has been an increase of the number of people being supported by an Adult Learning Disability Team going into paid employment

The Employment Service provide an extra 'Local Supported Employment' service for anyone with a Learning Disability or Autism aged 18 or older.

What we still need to do

We had planned that there would also be a new 'Skills and Employment Pathway' with employment support and training available through Day Services starting in 2020.

This was delayed due to Covid and but planning for this restarted in 2022.

3. Help with transition to Adult Services – a new Preparing for Adult Life Service

You told us that you wanted us to work with Children's Services to help with supporting people as they move into adulthood.

A new Preparing for Adult Life Service (1)

A new Preparing for Adult Life Service was designed in partnership with young people and their carers, as well as professionals

This team supports young people with a disability from aged 14 as they are preparing for adulthood.

A new Preparing for Adult Life Service (2)

There are four preparing for adult life outcomes which are:

- **Employment**
- **Being healthy**
- **Being part of your community**
- **Being independent**

A new Preparing for Adult Life Service (3)

People have told us that they really like the new Preparing for Adult Life Service

It has helped them to understand everything that is being done to help a person who is moving from Children's Services to being supported by Adult Services

A new Preparing for Adult Life Service (4)

Young people and their families have said that they like

Finding the right place to live, being healthy, being part of your community and thinking about work or further education and training is included as part of a person's transition plan.

4. Having transport to get about

You told us that “Transport means independence – getting to college, work, the doctor, a friend’s house”

Having transport to get about (1)

In 2020, we launched some extra travel training for people with a Learning Disability

to help them develop the skills to be able to get out and about and use public transport by themselves.

This travel training was linked to three Day Centres who were able to help train people to get out and about by themselves.

Having transport to get about (2)

We hope that Day Services will be able to help train more people to travel independently as part of the Day Opportunities support, they are now providing.

District Councils and the Health Service are making their own transport support, and this is something they will be discussing with Locality groups in the future.

What we still need to do

You have told us that taxis and bus drivers need to have training on learning disability, and we would like your help to design this training.

You have told us that you would like there to be better signs and information to help people with a Learning Disability when they are trying to find their way out and about.

5. Being healthy and happy

You told us that you would like help for people with a learning disability to get to their doctor and hospital appointments.

From the Partnership Board, you told us that you wanted more people with a learning disability to have an annual health check and for this to be done well.

Being healthy and happy (1)

Norfolk & Waveney NHS Service has worked with GP surgeries to help improve the health checks for a person a learning disability.

This includes working towards providing a health action plan for the person when they have a health check

Being healthy and happy (2)

Norfolk and Suffolk NHS Foundation Trust have introduced the Green Light Toolkit

This will provide extra help for people with a learning disability when they need to get mental health support.

The new Preparing for Adult Life Service works together with health services to help a young person with a learning disability and health needs, and their family carer

Being healthy and happy (3)

This helps with knowing what support is available and preparing for adult life.

Norfolk & Waveney NHS Service have provided a new training for Norfolk Adult Services called 'Positive Behaviour Support'

What we still need to do

As part of responding to a review of support for people in a specialist hospital carried out by the Norfolk Adults Safeguarding Board,

Norfolk and Waveney Health Service and Norfolk County Council have started co-production with people to agree how we work together better with the people we are supporting.

This is being led by Curators of Change and has already involved the Learning Disability Partnership Board.

Amanda Johnson (4)

Amanda informed the group that there will be a full report which goes into more detail

The full report will be released on the Learning Disability website at the end of July (the date may differ)

Open discussion (1)

Your thoughts on what you would like to see in the next Learning Disability Strategy?

This question was asked to the group. Here are their answers:

Open discussion (2)

To have a training course on basic IT skills and mobile devices

Reviews on old Learning disability strategy to see if all outcomes were achieved

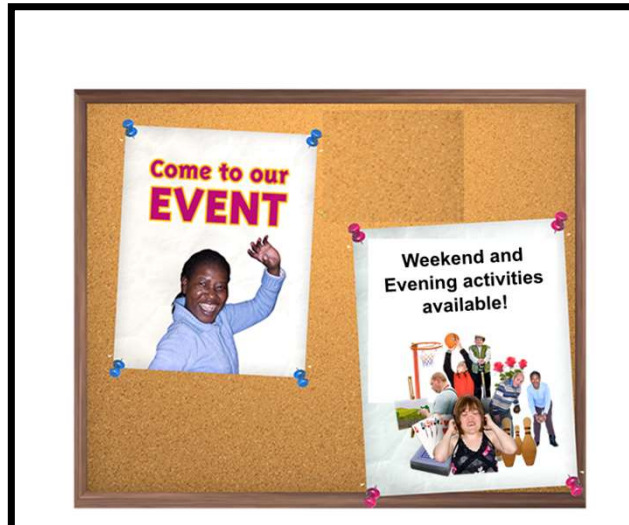

Start to make all information accessible. For example: having an easy read option

Open discussion (3)

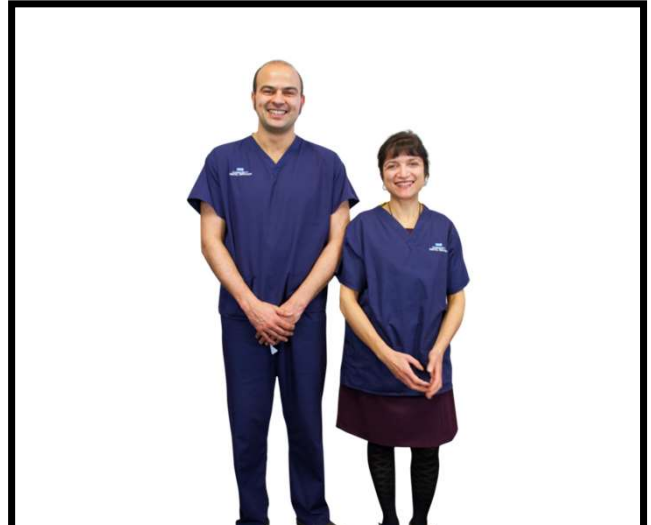

The image shows a map of the United Kingdom with a red dot on the south coast. An arrow points from this dot to an inset image of a group of people sitting around a table, labeled "Social Club".

For there to be more groups/clubs locally that people can get involved with

The image shows a corkboard with two posters. The left poster says "Come to our EVENT" and features a man waving. The right poster says "Weekend and Evening activities available!" and features a group of people playing bowling.

To have more activities available in the evening and weekends

The image shows two people, a man and a woman, standing side-by-side. They are both wearing blue scrubs, suggesting they are dental professionals.

Have more local dentists

Open discussion (4)

For people to be able to get prepared to live independently such as...

...Cooking classes,
Support to find the right transport...

...choosing who to live with and where to live.

Open discussion (5)

For there to be opportunities to be able to train in the workplace

To find out what work opportunities are available in the area

To have more learning disability specialist nurses in hospitals

Open discussion (6)

My area

Transport to be more accessible in rural areas

Transport worker

People from transport to be more involved. For example: attending locality meetings

New skills college
Learning for all

More housing with clear and easier transitions.

Open discussion (10)

Everything the group said was written down

From this feedback Amanda will look at how she can include this into the next Learning Disability Strategy
